SUMMARY

Full Stack Developer (Backend-Focused) with expertise in building secure, high-performance applications using Next.js, MERN and React Native. Skilled in RESTful API development, monolithic architecture, database optimisation, and cloud deployments. Experienced in helping businesses grow by developing, automating, and managing reliable digital systems that improve operations and user experience. Strong knowledge of networking, cybersecurity, and performance optimisation, with a passion for building production-ready backend infrastructure.

EXPERIENCE

Fullstack Developer (Intern)

Swafinix Technologies PVT LTD

November 2025 - February 2026, Kolkata ,WB

- Built a seller auto-pricing system from scratch, automating pricing workflows and reducing manual pricing efforts by 70% across operations.
- Implemented pricing logic, marketplace integrations for workflow automation, supporting real-time competitor tracking and dynamic pricing execution.
- Led client communication, cross-functional collaboration with 5+ stakeholders, requirement alignment, and production-ready feature deployments.

Backend Developer (Intern)

AppDost Complete IT Solution

November 2025 - January 2026

- Built secure JWT and RBAC authentication systems, supporting 3 distinct user roles across 1k+ active test accounts.
- Optimised PostgreSQL database schemas and queries, reducing average query latency by 35% for production systems.
- Developed 15+ high-performance REST APIs integrating validation, caching and error handling mechanisms built for scalable production deployment.

PROJECT

E-commerce Marketplace : SalesAkart

Freelance / Global Client • salesakart.com • March 2026 - May 2026

- Built a modular monolithic backend architecture for web and mobile apps, supporting 2k+ products with dynamic RBAC authorisation systems.
- Engineered backend services using Node.js, PostgreSQL, Redis, BullMQ, and Meilisearch, processing 50k+ asynchronous background jobs monthly.
- Developed event-driven infrastructure, integrated AWS S3, SES, Payfast, and Shiplogic courier aggregator for automated commerce operations workflows.
- Implemented distributed queue workers, inventory synchronisation, transactional email workflows, and payment processing orchestrator pipelines.

Price Automation for e-com sellers : TheSales

Swafinix Technologies • thesales.site • December 2025 - January 2026

- Built a scalable price automation platform, increasing seller sales by 70% and automating pricing for 1.4K+ marketplace products daily.
- Implemented marketplace scraping and auto-pricing workflows using Node.js, React, MongoDB, cron workers, and Takealot Public API.
- Processed 5K+ daily price updates with validation, rate limiting, retry mechanisms, audit logging, and real-time competitor price tracking.
- Designed JWT-based RBAC architecture with centralised monitoring, audit trails, and secure multi-role access for 6+ global D2C sellers.

Disposable temporary mail service : BlackMail

Personal Project • [Blackmail.vercel.app](https://blackmail.vercel.app) • October 2025 - October 2025

- Built a temporary email platform using Next.js, React, Tailwind CSS, ReactBits, and MongoDB, achieving sub-200ms response times globally.
- Developed backend APIs for ephemeral mailbox creation, automated email ingestion, and real-time link parsing through Mail.tm integrations.
- Integrated Notion APIs enabling SEO-optimised dynamic content rendering and improved search engine visibility workflows.
- Implemented optimised deployments, reducing storage usage by 60% and improving infrastructure efficiency consistently.

EDUCATION

Bachelor of Technology in Computer Science And Engineering

Baderia Global Institute Of Technology and Management • Jabalpur • 2027 • 7.71

- Campus Ambassador for Entrepreneurship Drive led by IIT Kharagpur, promoting innovation and startup initiatives among students.
- Associate Member at Social Responsibility Club BGIEM Jabalpur, contributing to community engagement and social impact activities.
- Earned NPTEL Elite Certification in Networking and Internet Protocols from IIT Kharagpur.

SKILLS

Programming Languages: TypeScript, JavaScript, Rust, C++, Python

Frameworks, Libraries and Tools: Node.js, Express.js, Next.js, React.js, React Native, Prisma, Mongoose, Postman, Burp Suite, Git, GitHub, Linux CLI.

BE & Security: RESTful APIs, JWT/NextAuth, encryption, cookies, WebSockets, WebRTC, Cron Jobs, Razorpay payments, and courier aggregator integrations.

Cloud/DevOps & Databases: VPS, AWS, S3, SES, Docker, Kubernetes, Render, Railway, Vercel, CI/CD (GitHub Actions), MongoDB, PostgreSQL, Redis.
